

MULTIPAK

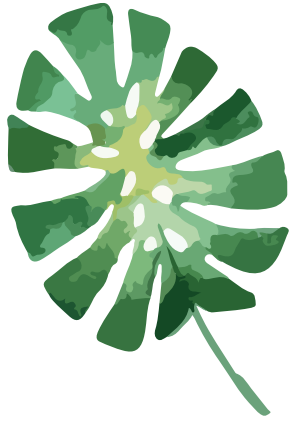

Environmentally friendly products will save the future.

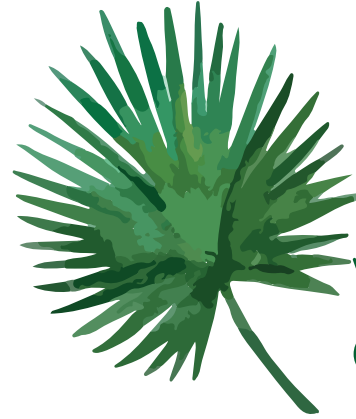

“Produces eco-friendly products that protect the future!”

WE INSPIRE!

- Behind our meticulousness in the production of paper plates, cups, cake baking capsules and baking molds, there is our determination to produce products not harming the environment and human health!
- This determination enables us to stand firmly behind our quality standards and words.
- The trust and point of view that we have developed made us the brand of inspiration for the sector in a short time.

WE ARE CREATIVE!

- We offer aesthetic and functionality with eco-friendly raw materials.
- Along with our innovative ideas under a single roof, we are creative thanks to our production capability in different fields!

The world was full of undiscovered potential, and people have lived by convincing themselves in the infinity of resources since the world began. At this point, we will either adopt better and sustainable lifestyles or just watch our extinction.

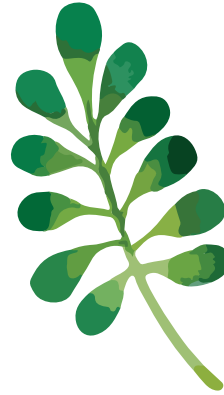

As Multipak, we have been producing in order to support sustainable life since it was founded. We are proud to fulfill all the conditions of being a

“eco-friendly brand”

in all our processes starting from the use of raw materials!

As well as contributing to a healthier planet, we are glad to grow rapidly in the local and European market with the eco-friendly strategies we have developed.

We draw our strength from our respect for the perfect functioning of nature.

**WE ARE
ECO-
FRIENDLY!**

- **Instead of obtaining raw materials required by the industry from existing trees, we supply from industry from forests.**
- **We produce 100% renewable products, the raw materials of which are cellulose, semi-cellulose and lignin, which are completely degraded by microorganisms in nature.**
- **We contribute to the protection of human health, water resources and nature.**

INSPIRED
BY NATURE!

produces
eco-friendly
products that
protect the
future!

Takes firm steps forward with its
8000 m²
production facility established in
Torbalı, Izmir on a
16.500 m² area,
70 m² showroom and
135 qualified personnel in total.

Multipak, one of Europe's industry-leading three companies, maintains its savings, experiences and knowledge gained in Sweden which offers innovations in terms of eco-friendly food packaging in Europe and which was elected as Europe's pilot area for practices, since 2007 as Turkey's first company with a Nordic Swan Ecolabel.

Our company produces paper plates, cups, cake baking capsules and other innovative products that the sector needs!

Human values such as quality, determination to produce products not harming the environment and human health, keeping our words in terms of delivery date and standards for our customers form the basis of our company mission.

PRODUCTION&DESIGN

Multipak focuses on each job specifically with its use of eco-friendly raw materials, customer-specific solutions and creative sense of design.

OUR BRANDS

Foliodream.

SWAN PROCESS

What is the SWAN label?

SWAN is the official ecolabel of the nordic countries and it is equivalent to the EU ecolabel.

Objective of SWAN

It aims to contribute to the studies for a sustainable life.

Its vision is to support a society maintaining the current conditions in order to meet the needs of the future generations. Therefore, it is significant for the consumer to prefer products with the SWAN and EU Ecolabel.

How does the SWAN process work?

A good or service is inspected from raw material to waste and the criteria are constantly challenged. Miljömarkning Sverige AB has been assigned by the government to take responsibility for the Swan and EU ecolabel in Sweden. These responsibilities include preparing the criteria, inspection and licensing the brands that are entitled to have this label.

What are the criteria for having a SWAN Ecolabel?

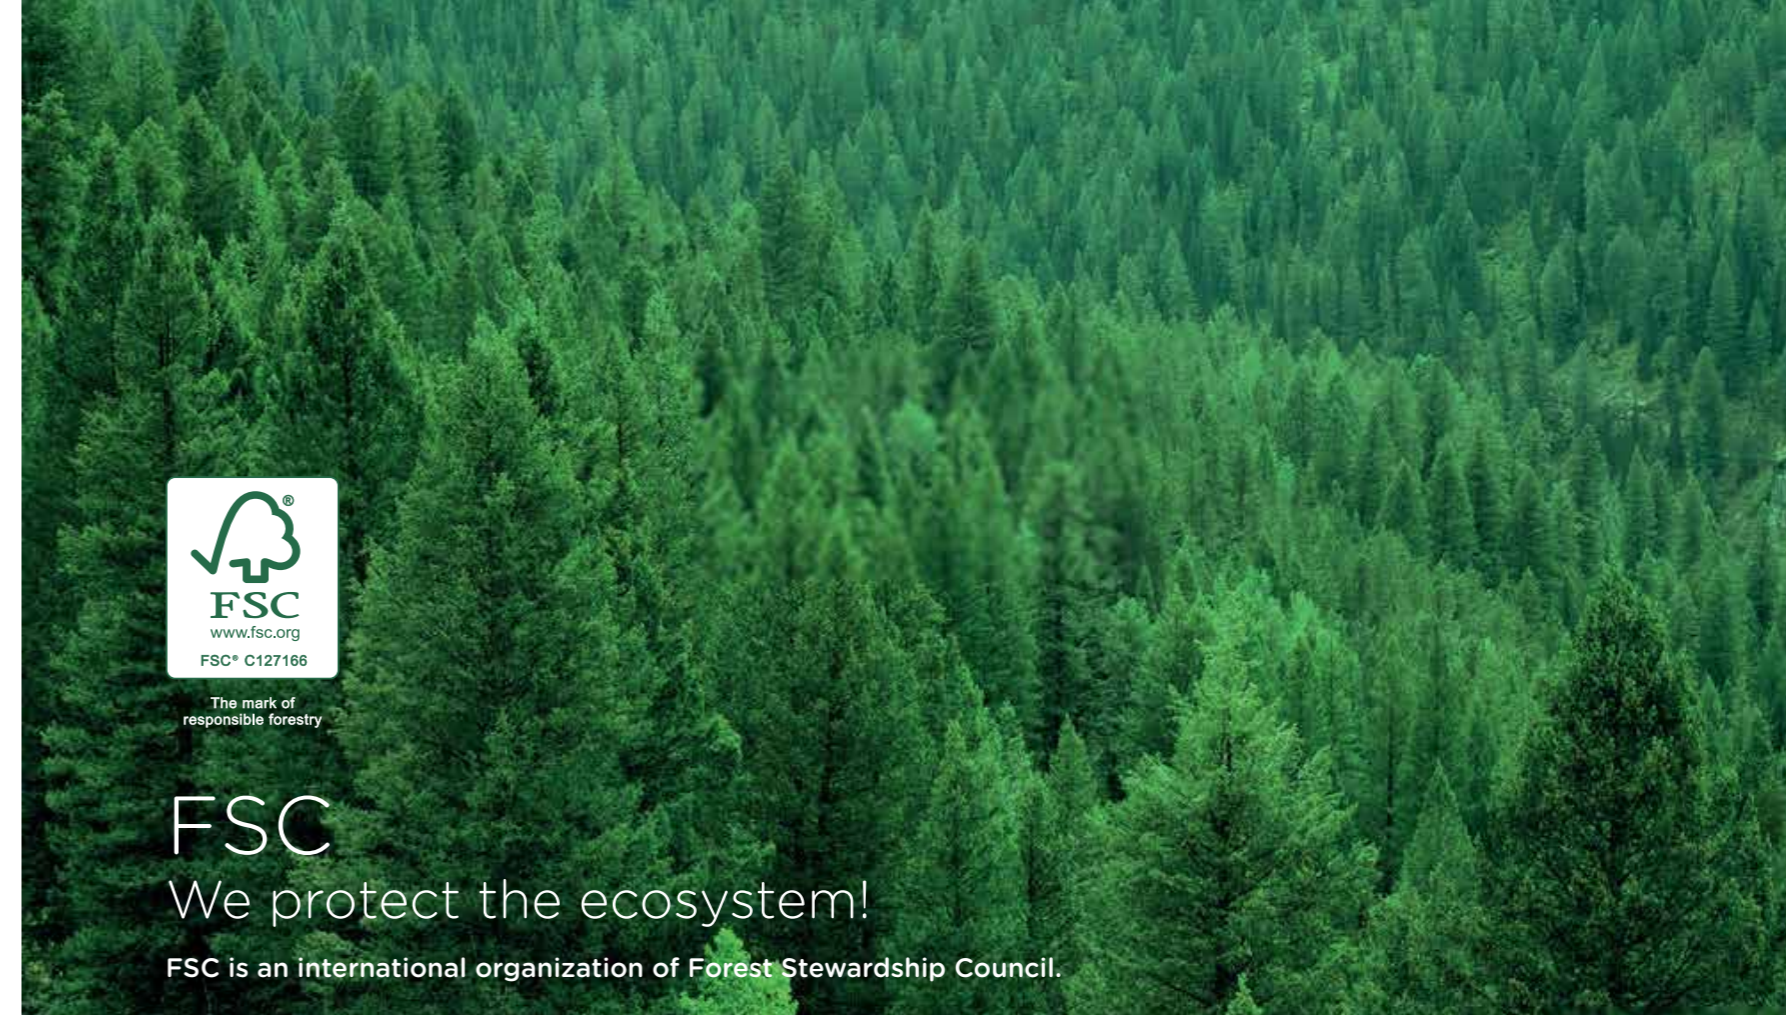

Many criteria regarding non-use of environmentally hazardous substances, air emission, water and soil, energy and resource usage, waste management should be fulfilled properly. Life cycle and holistic point of view are the key concepts of the SWAN process.

What is the difference of products with SWAN Ecolabel?

The brands with this label
* have a perspective of life cycle.
* have to fulfill the challenging environmental criteria being updated consistently.

Disposable
3047 0012

Working for a sustainable forest management, FSC carries out activities to determine and manage the international standards for proper usage of forestry products, and to provide independent compliance inspection for institution.

Thanks to this certificate, as Multipak, we carry out activities in accordance with the standards including all the processes, starting from supplying the forestry products to the delivery for consumers, and we work for a sustainable future.

Objective of FSC Certificate

To obtain wood and other forestry products without harming the forest productivity, biological diversity and ecological processes,

To carry out all the activities for profit in forests in a way not disturbing the ecosystem and society balance,

To provide systems enabling the society to benefit from forests and forestry products in the long term, but also supporting the sustainable usage of such products to have them involved in the long-term management plans.

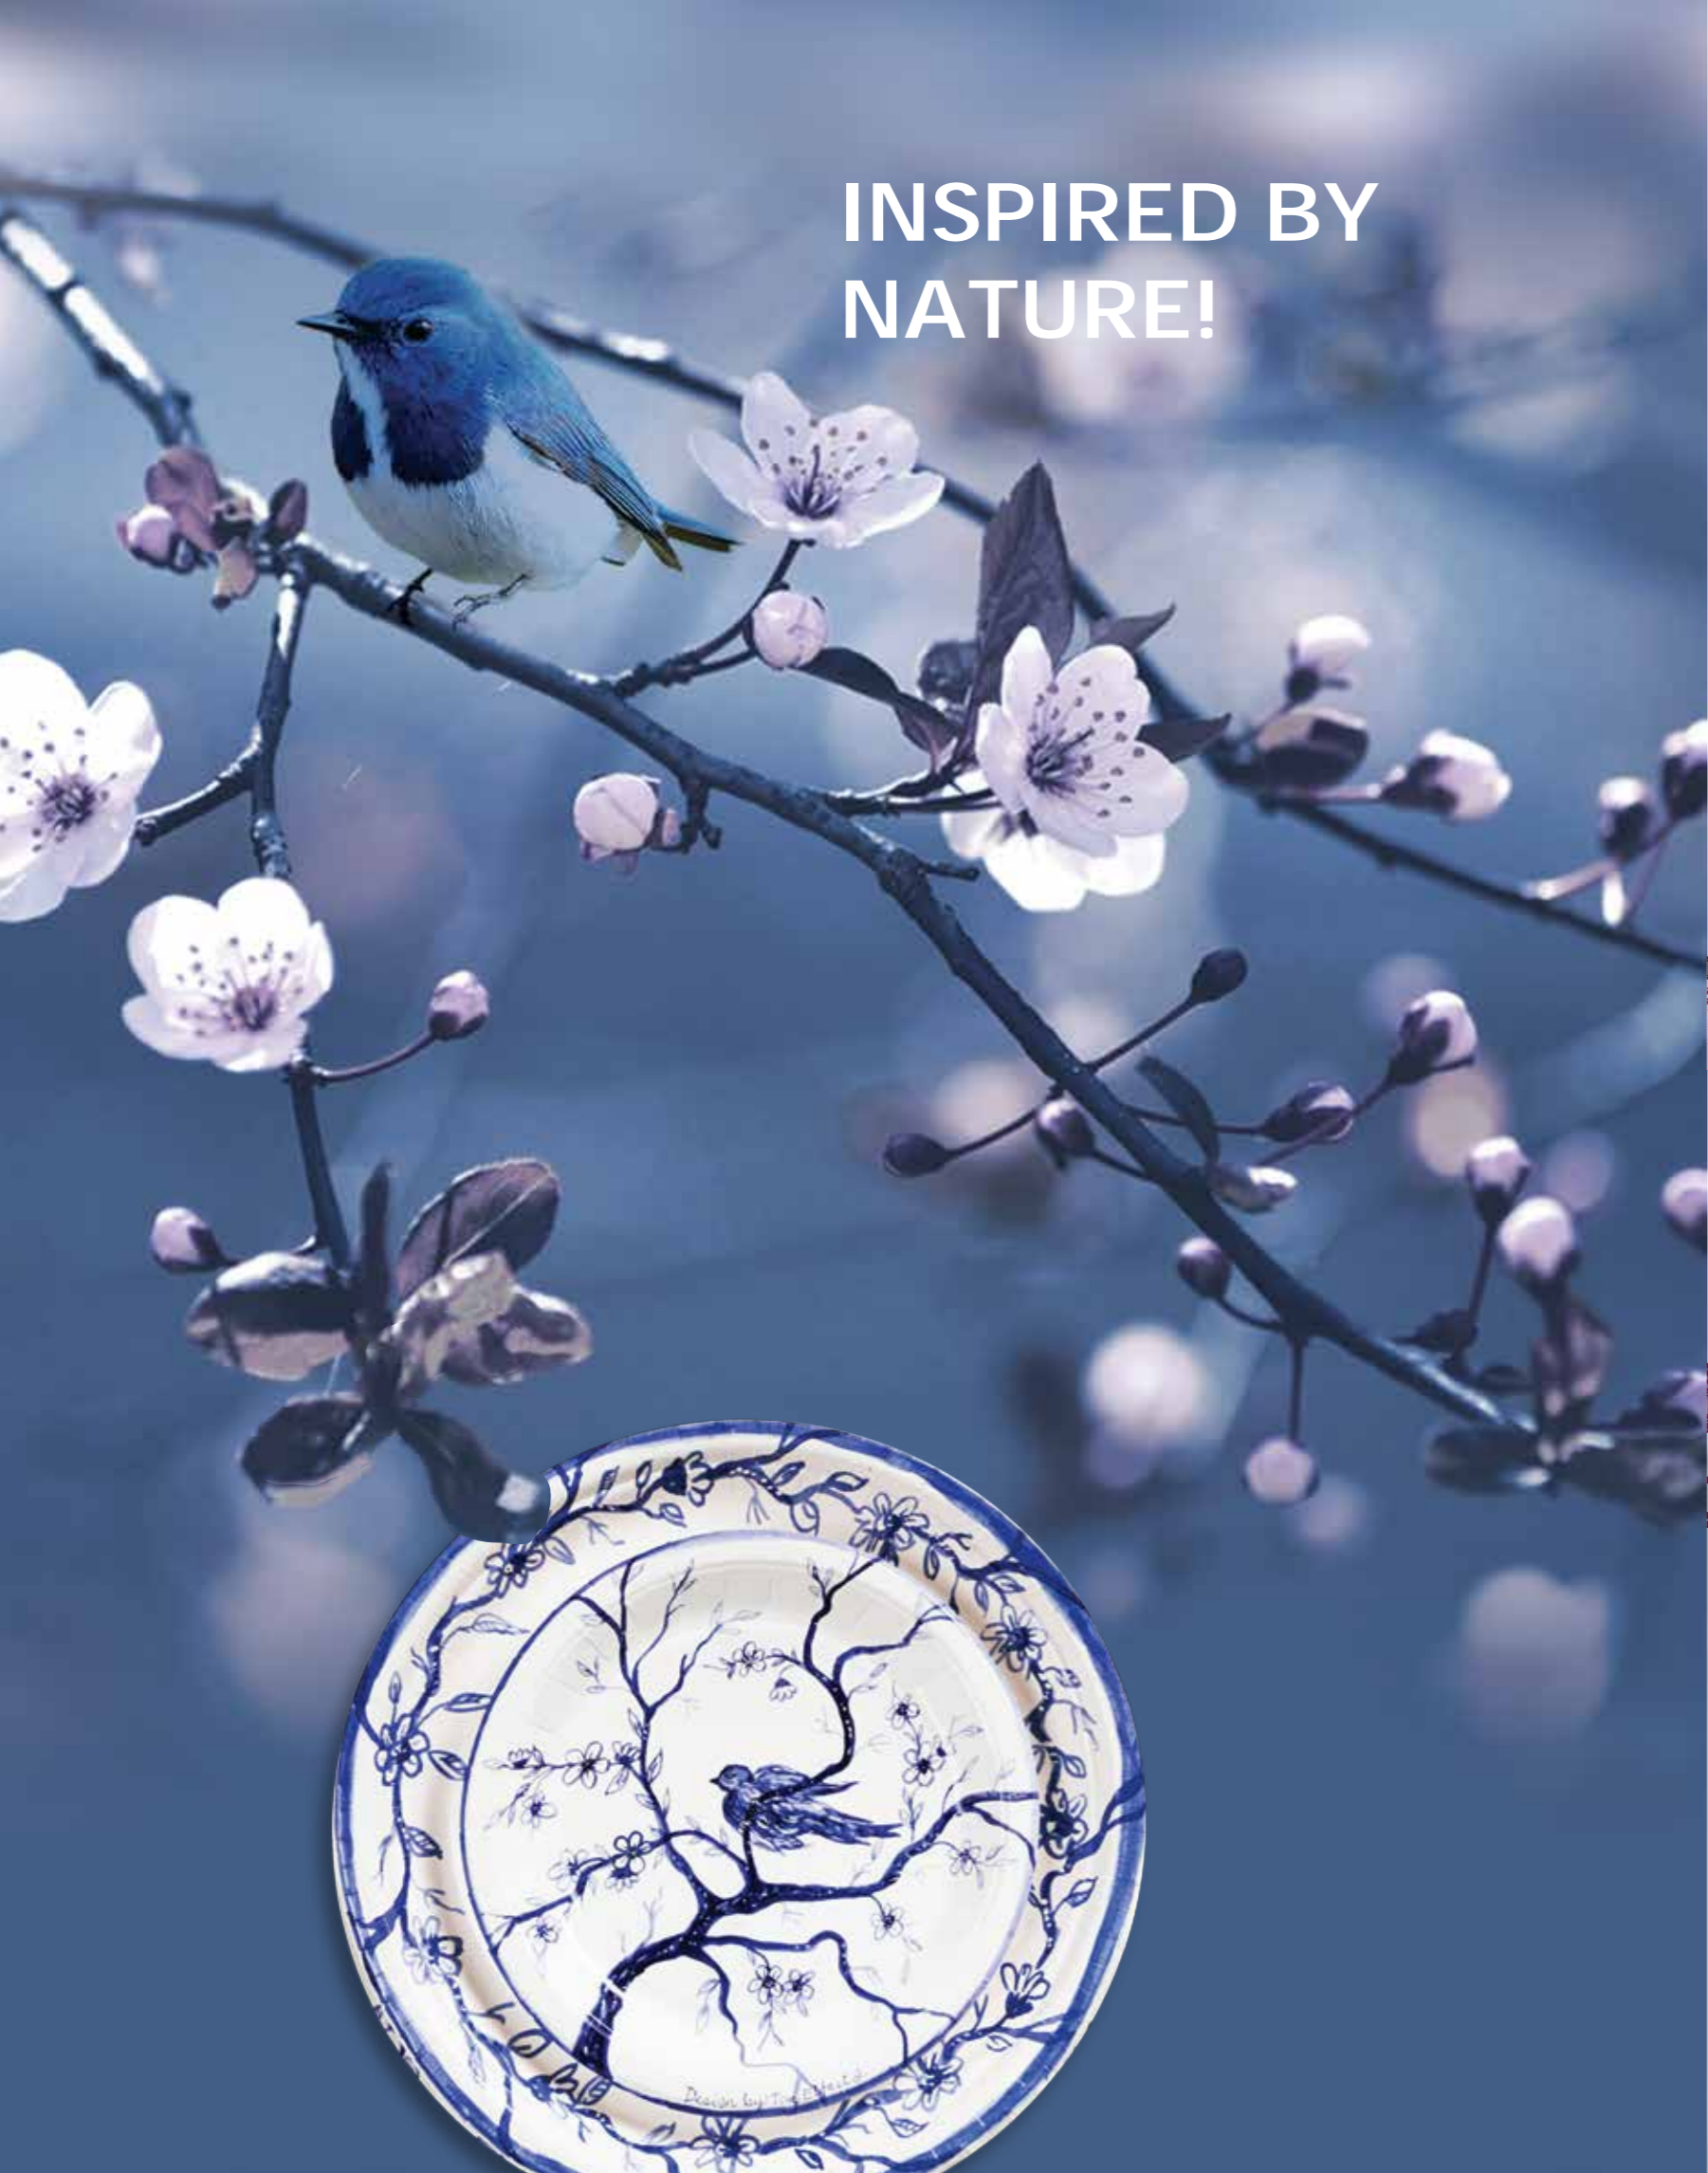

COMPOST

What taken from nature comes back to nature!

100% soluble biodegradable compost products are produced in a way that they can be regained to nature by degrading in a short term. Products, the raw materials of which are cellulose, semi-cellulose and lignin, contribute to the protection of water resources and nature as well as human health by degrading thanks to the microorganism in nature.

INSPIRED BY
NATURE!

PLATES

While making life easier with our disposable plates,
first we have permission
from nature.

Basic

We enrich simplicity.

- Eco-friendly
- Recyclable
- Healthy

x2 Double-Floor

Offers endurance and strength thanks to its double-floor thick structure.

- Eco-friendly
- Recyclable
- Healthy
- Suitable for microwave

Customized
designs,
extraordinary
tables
